

BASELINE ImPACT TESTING

FALL 2019

The ImPACT test is a computer based neurocognitive test that evaluates how the brain functions; it will test your memory, reaction time and motor speed. This baseline measure is **REQUIRED** prior to participation in athletics at The Woodstock Academy and must be taken at least once annually per school year for sports deemed "contact." Post-injury scores will be compared to baseline scores in order to make appropriate return to play decisions should you sustain a concussion during your participation in athletics.
